

02/10/10 - The last password you'll have to remember!

If you're like me you forget passwords. And it's tempting to write passwords down, or to use the same login for almost every website.

Here's something that's really helped me keep track of passwords, and keep more secure. Sometimes you really can have your cake and eat it too. =D

is highly recommended, and has won many awards. Best of all it's free, and works with all major browsers, and operating systems! www.LastPass.com. One recommended setting: During the installation, choose to have LastPass automatically log out when the computer is idle for a certain amount of time as a precaution in case your computer is ever lost or stolen.
